3 SampleResumeTemplates

Run the main code first(live the server)

JSON file for curl request

```
C:\Users\OMEN\Desktop\Round2>node main.js
No logging configuration. Using default config
Server is running on port 3001
Resume Generator: http://localhost:3001
```

After running the main code

```
C:\Users\OMEN\Desktop\Round2>curl -X POST -H "Content-Type: application/json" -
-data @SampleData.json http://localhost:3001/resume
{"message":"Resume generated successfully."}
```

Run the curl command given in text file
and wait for the success message.
